ABOUT ME

I have a growth mindset, and I am looking for an exciting and friendly environment to be challenged in. I enjoy the creative aspects of development, as well as building a project end to end. I have completed Le Wagon's 9-week Full Stack Web Development Bootcamp and I am looking forward to continue learning as part of a great team.

WEB DEVELOPMENT PROJECTS

TurnipTracker - theturniptracker.herokuapp.com

An Animal Crossing themed app, built with Python's Django framework. Users can log prices on their islands during the week and it helps them predict trends. It also includes a profit calculator.

HOP! - hop-brew.com

A social web app for discovering local beers. Built with Ruby on Rails, JavaScript and Active Record. We added a map feature using Mapbox, hosted images on Cloudinary, deployed to Heroku.

Cake - cake-vlr.herokuapp.com

A simplified Airbnb-like mockup that helps users to buy or sell cakes. Built with Ruby on Rails, CSS, Bootstrap, Cloudinary and Heroku.

EXPERIENCE

Aug 2015 - Nov 2019

After moving to London, I worked a number of jobs in hospitality. First as a barista at Costa Coffee, then a bar associate at JD Wetherspoon, briefly as a cocktail waitress at the London Edition.

My main goal was to learn English, which I managed to do whilst working in a fast-paced, high pressure team environment.

Aug 2014 - July 2015 | Social Worker | BÁH
